

Jenkins assignment no 4

Create 3 repo name master,dev,QA .each repo have their unique index.html .create 3 slave 1 for each repo and each slave have two jobs ie in first job install and start the httpd web server and in second job access the index.html file whenever change happen job get trigger and update the index.html

Dashboard > dev-slave2-job > Configuration

Configure

- General
- Source Code Management
- Triggers
- Environment
- Build Steps
- Post-build Actions

Max # of builds to keep
if not empty, only up to this number of build records are kept

2

Advanced ▾

☐ GitHub project

☐ This project is parameterized ?

☐ Throttle builds ?

☐ Execute concurrent builds if necessary ?

☒ Restrict where this project can be run ?

Label Expression ?

dev

Label dev matches 1 node. Permissions or other restrictions provided by plugins may further reduce that list.
